EXPERIENCE

- **Software Development Engineer I** November 2025 – Present
WLDD Private Limited *Remote*
 - Built core backend services for *Listable Labs*, implementing **prompt evaluation pipelines**, **background job processing** and **multi-tenant blog sites** on custom domains.
 - Own the revamp and migration of *ScoopWhoop*, building public website, internal CMS and backend.
 - Load tested the *ScoopWhoop* backend at **1000 concurrent users**, taking success rate from **55% to 100%** and **p95 latency from 22s to 777ms**.
 - Built internal services like *DataDaddy*, a **unified API** for social media scrapers used by internal apps and in-house consumer products to access data of creators and their content.
 - **Tech used:** TypeScript, Python, Express.js, MongoDB, Next.js, React.js
- **Freelance Software Engineer** May 2025 – September 2025
Stealth Startup *Remote*
 - Independently developed an automated, multilingual crypto news aggregation platform.
 - Designed an **ETL pipeline** that aggregated headlines from 5+ news sources, processing **~100 daily** and peaking at **278 in a single day**.
 - Built an **event-driven backend** using BullMQ to orchestrate **LLM-based article generation**, translation, and automated publishing to both the website and Telegram channel.
 - **Tech used:** TypeScript, Python, Astro, Hono, BullMQ, Redis, Docker

PROJECTS

- **Orbe** | *TypeScript, Next.js, tRPC, Drizzle* *View Project*
 - Orbe is an **outreach OS for freelancers and solo operators** that auto-enriches leads from a work email or LinkedIn profile and sends **hyper-personalized AI-written emails** through the user's own Gmail.
 - Built **fault-tolerant lead enrichment** with graceful fallbacks and a Redis-backed, LRU-rotating API key manager with rate-limit cooldowns.
 - **Tech used:** TypeScript, Next.js, tRPC, Drizzle, Redis
- **CreatorDaddy** | *TypeScript, Next.js, ChromaDB, Vercel AI SDK* *View Project*
 - Built a proof-of-concept ETL and semantic search system that scraped creator content, generated embeddings, and indexed them in ChromaDB for natural-language creator discovery.
 - Designed a hybrid retrieval architecture combining vector search with structured creator metadata (e.g., location, follower count, niche) to support intelligent creator recommendations.
 - **Tech used:** TypeScript, Next.js, ChromaDB, Vercel AI SDK

EDUCATION

- **Vidyalankar Polytechnic** Wadala, Mumbai
Diploma in Computer Engineering / Passed with **90.12%** *2023 - 2026*

SKILLS

- **Languages:** TypeScript, JavaScript, Python
- **Backend:** Node.js, Express.js, Hono, FastAPI, tRPC
- **Frontend:** Next.js, React.js, Astro, TanStack Query
- **Databases:** MongoDB, PostgreSQL, Redis, SQLite, ChromaDB
- **Infrastructure:** Docker, BullMQ, Git
